Professional Summary

Full Stack Developer who has built and shipped Stratos — a production multi-tenant SaaS platform with drag-and-drop page builder, AI content generation, RBAC, and Razorpay payments. Experienced across the full stack with React.js, Next.js, Node.js, Express.js, and MongoDB, with a strong interest in AI-powered product development using Gemini API and OpenAI SDK.

Projects

Stratos — Agency Website Builder — Next.js, TypeScript, Prisma, Razorpay, Tailwind CSS, Clerk [Github](#) • [Demo](#)

A multi-tenant SaaS platform for digital agencies to manage clients, build funnels, and handle billing — featuring a visual drag-and-drop page builder with AI-powered content generation.

- Architected a production multi-tenant SaaS platform (39,000+ lines, 282 source files, 25 database models) with 4-role RBAC, agency/subaccount isolation, and Clerk-based authentication using Next.js 16 and Prisma ORM
- Built a visual drag-and-drop page editor with 20+ component types, custom state machine (useReducer + discriminated union), undo/redo history stack, and AI-powered layout generation via Gemini API
- Integrated Razorpay payment system with HMAC-SHA256 webhook verification, INR subscription lifecycle management (₹999/₹2,999 plans), and feature gating — all verified server-side with zero client-side secrets
- Designed a Kanban CRM pipeline with MongoDB-style relational schema across 25 Prisma models, drag-and-drop ticket management, per-lane financial tracking, and cascade delete data integrity
- Shipped a full multi-page funnel builder with subdomain-based live rendering, visitor analytics, 7 CSS themes with flash-free persistence, and a Monaco-powered code editor with live preview

Quizard — Next.js, Supabase, AI, shadcn/ui, Tailwind, OAuth [Github](#) • [Demo](#)

An all-inclusive AI-based quiz solution system that simplifies the entire process of quiz creation and management. It allows users to create, customize, edit, and attempt quizzes from text inputs or PDF files.

- Built an AI-powered quiz platform using Next.js and Supabase that transforms text or PDF inputs into question sets in under 10 seconds
- Leveraged Gemini API to auto-generate quizzes with 3 configurable difficulty levels and custom question counts
- Developed interactive quiz player with automated scoring and a dynamic editor supporting real-time content modification
- Implemented OAuth authentication and designed a scalable PostgreSQL schema on Supabase handling multi-user quiz data

Experience

Karmadude ITSolutions|Ahmedabad [certificate](#)
June 2025 – July 2025

- Built and maintained Legacy Gifts, a corporate gifting platform using React.js, Tailwind CSS, Redux Toolkit, and Supabase serving business clients
- Implemented Supabase backend with authentication, relational database design across 5+ tables, and REST API endpoints
- Designed secure role-based authentication flows and a data-driven dashboard with real-time metrics
- Collaborated with a 3-person frontend team to integrate APIs and ensure cross-browser performance
- Delivered production-ready features within a 2-month internship timeline across backend systems and cloud deployment

Technical Skills

- Languages:** JavaScript (ES6+), Java, Python, C
- Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, SCSS
- Backend:** Node.js, Express.js, Flask, FastAPI, Fastify, REST APIs
- Databases:** MongoDB, Supabase (PostgreSQL), Neon DB, Drizzle ORM
- State Management:** Redux Toolkit, Zustand, React Hooks
- AI & Tools:** Gemini API, Claude, OpenAI SDK, Claude Code, GitHub Copilot, Codex
- Concepts:** OOP, Data Structures, Algorithms, SDLC, RBAC, Webhooks
- Tools & Platforms:** Git, GitHub, Postman, VS Code, Netlify, Render, Clerk, Razorpay, UploadThing

Education

Gandhinagar University **Sep 2022 – May 2026**
B. Tech in Computer Engineering CGPA: 82.6%

Certificate

Front End Development – CSS, Great Learning Academy (Aug 2023)	View
ReactJS Course – ReactJS, Scaler Topics (Aug 2024)	View
Full-Stack Webinar, TOPS Technologies (Jan 2026)	View
